EXAMINER'S AMENDMENT

Priority

1. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by Kia Silverbrook on 28 August 2006.

1. The application has been amended as follows: The last line of claim 5 is changed to read "returning a one if the third and fourth parameters are equivalent to authenticate the memory space."

2. The following is an examiner's statement of reasons for allowance:

Doljack, USPN 6,442,276, discloses a method of authenticating memory space of an authorized accessory of a device (column 1 lines 5-12), the method including the steps of: storing secret key, K1 (public/private keys) and hash function K2 (hash function), in an integrated circuit of the device (column 4 lines 35-56) and in the memory space of the accessory (column 4 lines 57-62), generating a random number R (column 5 lines 55-60) and a first parameter being a function of R using the key K1 (public/private key) of the integrated circuit of the device (column 11 lines 9-15), calling

a read function defined by the accessory using a second parameter being a function of R using the key K1 of the accessory (column 11 lines 15-19), and if the first and second parameters are equivalent (if the second parameter decrypts), calling a test function of the integrated circuit using a fourth parameter being a function of R using the hash function K2 of the integrated circuit device (column 11 lines 19-22), and returning a one if the third and fourth parameters are equivalent (column 11 lines 22-23). Doljack does not disclose using a second key for K2, but only a hash function, which is not disclosed as being a keyed hash function. It would not have been obvious for one of ordinary skill in the art to use a second key instead of the hash of Doljack, since there is no motivation to do so.

3. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Lipman whose telephone number is 571-272-3837. The examiner can normally be reached on M-Th 7 AM-3 PM.
